BREAST CANCER SURVIVORSHIP
FOR PRIMARY CARE PROVIDERS

January 21, 2021
Noon MST

> Click here to register > View the flyer

In this CME webinar we will discuss the long term management of breast cancer survivors including the surveillance imaging indicated, clinical examination follow up, management of hormones and side effects of treatment. We will also review lifestyle recommendations for patients to reduce the risk of recurrent breast cancer and discuss sexual health and quality of life issues for the breast cancer survivor.

ENDOCRINE CARE SERIES FROM PROJECT ECHO

University of Utah Health is pleased to announce the new Endocrine Care ECHO. This monthly series connects endocrinology specialists to primary care providers in rural and urban areas. Providers and clinical staff will be taught best practices for the management of diabetes, thyroid disorders, and more.

More info on page 3 of this newsletter, or the Project ECHO website.

EXECUTIVE EDUCATION
LEADERSHIP DEVELOPMENT

Physician leaders, nurse managers, and clinic administrators can improve their leadership skills through courses from the Eccles School of Business.

Certificates are available for courses in executive leadership, women's leadership, and Lean operations.

Find more info here, or see the calendar here.

To inquire about special bookings for your group, email education@hsc.utah.edu
TRAUMA GRAND ROUNDS
CHEST TRAUMA AND RIB PLATING

UPCOMING EDUCATION EVENTS FOR INTERPRETING SERVICES

Does your clinic face challenges in serving patients with hearing impairments or language barriers?

Interpreting services at University of Utah Health has created a questionnaire to help assess the needs for language services at different facilities. Your feedback will be instrumental in understanding how we can improve Clinical Education regarding Interpreting services.

We are pleased to announce the launch of
Endocrinology ECHO
January 12, 2021

The Endocrine Care ECHO group connects endocrinology specialists to primary care providers in both rural and urban areas. This program, using teleconferencing technologies, will facilitate education of all clinicians in best practices of diabetes management and care of other endocrine diseases. It will feature live, interactive seminars focusing on evidence-based disease management. Non-specialist clinicians will be able to present cases and receive feedback in real time directly from endocrinology specialists.

A total of 12 ECHOs in 2021 will focus on various topics in Endocrinology with the end goal to improve patient care in rural and urban areas where direct access to endocrinology specialists is not available.

To access the Endocrinology website click this link. https://physicians.utah.edu/echo/

Sessions will be held monthly starting
Tuesday, January 12, 2021, noon – 1pm
For questions reach out to Genevieve Ellis, genevieve.ellis@hsc.utah.edu

| **Data Usage Notification**  
| In order to support the growth of the ECHO movement, Project ECHO® collects participation data for each ECHO program. This data allows Project ECHO to measure, analyze, and report on the movement’s reach. It is used in reports, on maps and visualizations, for research, for communications and surveys, for data quality assurance activities, and for decision-making related to new initiatives. Please contact us at project.echo@hsc.utah.edu with any questions or concerns. |
