University of Utah Project ECHO
Nursing Home COVID-19 Action Network

In partnership with the Agency for Healthcare Research and Quality (AHRQ), the ECHO Institute, the Institute for Healthcare Improvement, the University of Utah Project ECHO team will provide training, mentorship, and support to nursing home staff on infection prevention and control to nursing homes across the state of Utah and the western region. Nursing homes will be compensated for their participation in this 16 week program. Each participating facility will need to have two participating staff members join each week.

This education series has the following goals:

- Preventing COVID-19 from entering nursing homes via staff, visitors, and patients.
- Should the virus enter the nursing home, preventing greater spread among patients, staff, and visitors.
- Protecting staff from infection and ensuring best-practice safety measures.
- Helping staff build confidence in their work, feel safe from infection, and support staff retention.
- Ensuring that patients who are dying from COVID-19 can safely receive visitors.

CMS Qualifying nursing homes will be compensated $6000 for participating in this ECHO series

New Cohort Will Launch
February 2021

Please email sarah.day@hsc.utah.edu for exact date and time information
Highlighting our New ECHO series

**Endocrinology ECHO**

The Endocrine Care ECHO group connects endocrinology specialists to primary care providers in both rural and urban areas. This program, using teleconferencing technologies, will facilitate education of all clinicians in best practices of diabetes management and care of other endocrine diseases. It will feature live, interactive seminars focusing on evidence-based disease management. Non-specialist clinicians will be able to present cases and receive feedback in real time directly from endocrinology specialists.

Register/Join the session: [HERE](https://physicians.utah.edu/echo/)

**Tuesday, February 9, 2021, noon – 1pm**

**Data Usage Notification**

In order to support the growth of the ECHO movement, Project ECHO® collects participation data for each ECHO program. This data allows Project ECHO to measure, analyze, and report on the movement’s reach. It is used in reports, on maps and visualizations, for research, for communications and surveys, for data quality assurance activities, and for decision-making related to new initiatives. Please contact us at project.echo@hsc.utah.edu with any questions or concerns.
